Instructions on how to re-ink your stamps or stamp pads!

It is a snap to add more ink to your stamps or stamp pads. There is no mess and it can be done in just seconds. Find the type of stamps you have and follow the easy step by step directions below.

Xstamper Stamps

1. Take the cover cap off of the stamp.
2. Hold the stamp upside-down with the impression area of the stamp pointing upwards.
3. Take the cap off of the Xstamper ink bottle in the proper color.
4. Holding the Xstamper ink bottle over the impression area, gently squeeze the bottle. Let four to eight drops of Xstamper ink to fall throughout the surface of the lettering. Do not over ink your stamp!
5. Place the cap back onto the stamp and Xstamper ink bottle.
6. Allow the ink to seep into the ink pad. For full effect, it takes several hours for the ink to soak into the stamp.

Pre-Inked Stamps

1. Take the cover cap off of the stamp.
2. Hold the stamp upside-down with the impression area of the stamp pointing upwards.
3. Take the cap off of the pre-inked ink bottle in the proper color.
4. Holding the pre-inked ink bottle over the impression area, gently squeeze the bottle. Let four to eight drops of pre-inked ink to fall throughout the surface of the lettering. Do not over ink your stamp!
5. Place the cap back onto the stamp and pre-inked ink bottle.
6. Allow the ink to seep into the ink pad. For full effect, it takes several hours for the ink to soak into the stamp.

Self-Inking Stamp Pads

1. Flip the stamp upside down on a flat surface.
2. Hold the sides of the stamp and push down on stamp slightly (about 1/4").
3. While pushing down on the stamp slightly, push the ink pad with your finger outward. The ink pad will pop out the of the stamp housing.
4. Take the cap off of the self-inking ink bottle in the proper color.
5. Holding the self-inking ink bottle over the ink pad, gently squeeze the bottle. Let eight to twelve drops of self-inking ink to fall throughout the ink pad. Do not over ink your stamp!
6. Place the cap back onto the self-inking ink bottle.
7. Allow the ink to seep into the ink pad. To speed up this process you can use a jumbo paper clip to gently push the ink into the ink pad.
8. While pushing down on the stamp slightly, push the re-inked ink pad with your fingers back into place.
9. Once you have inserted the ink pad, flip the stamp over to the stamping position and push down on the stamp top.
